

```
from flask import Flask
app = Flask(__name__)

@app.route("/")
def helloworld():
    return "Salutations World!"

if __name__ == "__main__":
    app.run(
        host="0.0.0.0",
        port=5000
    )
```

VM Questions

1. A snapshot is a copy of the VM's disk file at a given time. They are useful to have in order to restore a VM to that particular time in case of system error.
2. `sudo apt-get update`
3. Yellow Dog Linux uses YUM. Pacman is used in Arch Linux, Frugalware, and DeLi Linux.
